

# Knights' Quest Ministries' Social Media App Quick Reference

**Knights' Quest Ministries**  
**[www.knightsquest.org](http://www.knightsquest.org)**  
**Fort Worth, TX**

Available for download on the  
Knights' Quest Ministries page on Facebook

	<p><b>Ask.fm</b> - Anonymous Q&amp;A. Links for to strangers. Has been used for cyberbullying linked to suicides.</p>
	<p><b>Audio Manager</b> - Vault app. Allows you to hide apps, photos, videos, etc. behind a PIN/passcode while looking like a music manager.</p>
	<p><b>Bigo - Live Steaming App. No age verificatoin and users have to provide personal info. Inappropriate/sexual content, cyberbullying, profanity, &amp; violent content are common</b></p>
	<p><b>Blindr</b> - Hook Up/flirting app: Same thing as Tinder. Shares location data. No age/identity verification.</p>
	<p><b>Burn Book</b> - Messaging app that enables posting of anonymous info. It is text only. Used for cyberbullying. Connects with <u>nearby</u> strangers.</p>
	<p><b>Calculator%</b> - Vault App. Allows you to hide apps, photos, videos, etc. behind a PIN/passcode while looking like a calculator (even has come calculator functions!).</p>
	<p><b>Calculator+</b> - Vault App. Allows you to hide apps, photos, videos, etc. behind a PIN/passcode while looking like a calculator (even has come calculator functions!).</p>
	<p><b>Chatous</b> - Texting app: Randomly connects users. Can send "disappearing" messages.</p>
	<p><b>ChatRad</b> - Web-based random video chat. Enables video chat with strangers</p>
	<p><b>Chatroulette</b> - Video chat: Connects kids to random people around the world. Easily exploited to have kids send inappropriate images/videos. Can be used for cybersex</p>

	<p><b>Discord</b> - Chat app. Both public and "private" servers can be accessed. Hate groups and NSFW groups are common.</p>
	<p><b>Faceflow</b> - Video chat. Connects kids to random people around the world. Easily exploited to have kids send inappropriate images/videos.</p>
	<p><b>HP/HIP (Hide It Pro)</b> – Vault App. Like the calculator apps that hide porn and such, HIP is not what it seems. It resembles a music management app but still serves as a hidden vault for stashing inappropriate material.</p>
	<p><b>Holla</b> - Chat app. Randomly connects users to complete strangers. Contains a good amount of sex/nudity.</p>
	<p><b>Hot or Not</b> - Hook Up App. People rate your profile with the intent to find a hookup.</p>
	<p><b>Houseparty</b> - Video/Text Chat. No screening tools, so kids can be exposed to inappropriate content via live videos,etc. Links can also be shared. Also possible to record received videos.</p>
	<p><b>IMVU</b> - Virtual world game (like THE SIMS). Nudity and sexual encounters in 18+ sections, but also sexual banter and behaviors in the all-ages area, too. Profiles are all public and there has been cyberbullying and predatory activity.</p>
	<p><b>Instagram</b> - Photo-sharing app, Used by hackers. Lots of porn (Instaporn).</p>
	<p><b>KIK</b> - Chat. Users/friends/age are not authenticated. Has been used for sexting and "sextortion". So popular that "KIK Buddy" has replaced "sexting buddy". No parental controls.</p>

	<p><b>Line</b> –Another chat/texting app. Full of scams, phishing, and predators. Lots of avenues for in-app purchases, so kids can spend money very easily.</p>
	<p><b>Live.me</b> – Allows users to watch or create live, streaming videos which include geolocation. Users earn “coins”. Pedophiles are known to offer coins for pictures from kids. No meaningful security.</p>
	<p><b>MyLOL</b> - Full of adult conversations regarding sex, drugs, drinking, and self-harm/abuse. No identity verification</p>
	<p><b>MeetMe</b> – Introduces users to other users nearby. Questions can be exchanged. User information is not verified. Also has private chatting and image sharing.</p>
	<p><b>Monkey</b> – Randomly connects users to a total stranger for a 15 second chat. Users see both age and gender. Easily abused by predators.</p>
	<p><b>Omegle</b> – Omegle’s purpose is to let you connect to strangers and video chat with them. Home page even admits that predators use their system.</p>
	<p><b>Periscope</b> – Live streaming app. Users can post whatever they want without monitoring. Bullying, NSFW content, and lack of user information security is a problem.</p>
	<p><b>Snapchat</b> – Allows users to send images/videos that supposedly disappear after they are viewed. Pics/vids DO NOT disappear. Encourages/enables sexting.</p>
	<p><b>Tellonym</b> – Anonymous messenger/chat app. Frequent bullying, violent threats, and adult content. Offers unmonitored access to the Internet.</p>
	<p><b>Tik Tok</b> (formerly musical.ly) – Kids can make short music videos (3-15 seconds) and short looping videos (3-60 seconds) Accounts are public and language is often “colorful</p>

	<p><b>Tinder</b> – Dating and “hook up” app. Used for one night stands. While rated 17+ Tinder lets kids as young as 13 register. Helps “find” others nearby. Used by predators, stalkers, etc.</p>
	<p><b>TinyChat</b> - Anonymous chat, single or group, by text or video. Used to connect with strangers. Can lead to sexting or other inappropriate chatting.</p>
	<p><b>Tumblr</b> – Micro-blogging app enables sharing of ideas, images, and videos. Filled with pornography. Even through TUMBLR announced it was cleaning house, porn remains. Glorifies self-harm and eating disorders</p>
	<p><b>Vaulty</b> - Vault app, as the name implies. Android only. Allows users to hide pictures and videos</p>
	<p><b>Vine</b> – Allows posting videos up to 6 seconds. These range from innocent to pornographic. Porn easily found through keyword searches</p>
	<p><b>Voxer</b> – A type of “walkie talkie” app. Can be used for bullying.</p>
	<p><b>WeChat</b> – Free chat/messenger app. Encourages and enables connections with nearby or distant strangers. Vulnerable to predators.</p>
	<p><b>WhatsApp</b> – Facebook messaging/texting product. Recent issues with spyware and malware. Shares data w/ Facebook. Often used for fake news and hoaxes.</p>
	<p><b>Wishbone</b> – A poll/comparison app. Users create or take polls. This includes polls on adult topics, and some are very explicit.</p>
	<p><b>Whisper</b> – Anonymous account for “sharing secrets”. Easily abused. Shows user’s location. Younger children discovering it. Reports of rapes/assaults on users.</p>

	<p><b>YouTube</b> – YouTube gives kids a place to post their videos. Unfortunately, YouTube has a lot of inappropriate content and a known pedophile problem.</p>
	<p><b>Yubo (formerly Yellow)</b> - Often called “Tinder for teens”. Easily exploited by predators, traffickers, and those attempting sextortion. Connects with Instagram and Snapchat.</p>
